Iruvuri Bhargav Ram

Data Analyst

Professional Summary

Dynamic Data Analyst skilled in SQL, Python, Power BI and visualizations with a strong capability in rapid adaptation to new tech stacks and AI. Proven expertise in data cleaning, visualization, creating impactful dashboards, and statistical analysis, with a passion for providing actionable insights to drive strategic decisions.

Projects

Indian Startup Funding Analysis [Github Repo Link](#)

Power BI Git Python SQL Jupyter Notebook

- Collaborated with a team to develop a real-time Power BI dashboard for Adventure Works dataset.
- Used Python for data cleaning to enhance accuracy of sales performance and regional analysis insights.
- Integrated MySQL for centralized, efficient data access supporting decision-making.
- Created user-friendly, interactive visualizations in Power BI for stakeholder communication.

Los Angeles Crime Analysis [Github Repo Link](#)

Git Python Jupyter Notebook PowerPoint

- Analyzed LA crime data using Python tools like Pandas for preprocessing.
- Built an interactive dashboard with Streamlit to provide insights into crime trends and hotspots.
- Delivered a comprehensive data visualization project to facilitate understanding of local crime patterns.

Adventure Works Sales Analytics Dashboard

[Github Repo Link](#)

Power BI Python Git SQL

- Collaborated with a team to develop a real-time Power BI dashboard for sales performance and regional analysis.
- Utilized Python for data cleaning and processing, ensuring data accuracy and reliability for actionable insights.
- Integrated MySQL for centralized data storage, facilitating efficient data access and manipulation.
- Created user-friendly, interactive visualizations and reports in Power BI to communicate critical metrics and insights.
- Contributed significantly to translating business needs into data analysis solutions, supporting decision-making processes.
